Online Business Tools

Online Business Tools

No matter what type of micro or small business you wish to start in today's world you will need the right online Business tools.

There are many tools here which can help you as they have helped me. But what is important is that - these have helped me and my clients grow successful Small Business models and we need the right tools to grow a small business the right way.

It could be just you or a team of 100 - but no matter how big or small you are you will always need the right tools and resources in order to become a successful Small Business owner who can grow and survive where others sadly don't.

IMPORTANT: So you need to have the right Online Business Tools.

***This is NOT* a 'MAKE MONEY NOW' blog! I have spent the last 14 years cultivating my Small Business Consulting brand and name through repetition, hard work, focus and strategic action and unless you can do this you will never succeed.**

Online Business Tools I Use

Online and any revenue generation and growth takes a lot of work - just like all other Small businesses, models and types, so if you cannot apply daily routines and work consistently to grow your Small business strategy you will just never make it. It takes focus, great teams, leadership, systems and processes which are measured and managed and a solid vision or goal with the kind of passion that is rare. If that is you then you can grow a small business.

There are certain principles to follow, and if you can follow these you can build your dream Small

business model.

This is where solid leadership comes in as we need to be able to lead ourselves and our teams effectively every day where there is open great communication, active listening, diversity, passion and drive. This is so that each person in their respective role works their best and as a part of the overall vision of the team and ethos of the business mission.

Tools can only be effective if used right - and by the right people with the right systems, processes and structure.

I have added all of the online tools I use here I USE to create a great monthly income.

It took me a little longer to master all of these and to find the tools and resources I value - and now I can recommend them to you. Today I outsource and have a small team of 10 to help me - and my team have helped me grow. NOTE: I do receive affiliate commissions from some of these companies.

over the average, therefore, shop around and make sure that your hosting company are reasonably priced, have great customer service, have all the features and benefits you need and are reliable.

NOTE: Most the expensive option in business does not always mean the best and this can be in any area. Look for what would suit you the most and your needs over anything else.

Personally I trust a company called SITEGROUND. They are very generously offering a great deal to help struggling business owners throughout the corona crisis. Try them for just:

Well CRM stands for *customer relationship management*. It's a category of integrated, data-driven software solutions that improve how you interact and do business with your customers. CRM systems help you manage and maintain customer relationships, track sales leads, marketing, and pipeline, and deliver actionable data.

I have tried many and i personally love Pipedrive the most. It's features and benefits are what I need so, it works well for me.

I do suggest that you use some form of CRM software in your business in order to really know what's going on every day with your customers and this will also help you grow way faster as you can monitor activity and keep the relationship strong. [CHECK OUT PIPEDRIVE HERE](#)
